

Technical Lead Microsoft Azure Security

We are looking for a Microsoft Azure Security Technical Lead to join our consultancy team in the SI Business Unit. No-nonsense, relaxed and informal, that typifies QS solutions (and you) best.

You will get plenty of room to take initiative and work together with colleagues on even smarter and better Microsoft security solutions for customers.

This role will report directly to the SI Business Unit Manager and will contribute to the overall growth of QS solutions.

Responsibilities

Develop Security Offerings:

- Collaborate with the management team to define and develop comprehensive Azure security offerings.
- Stay up-to-date with the latest security trends, technologies, and best practices in the Azure ecosystem.
- Identify opportunities to enhance existing security services and create new offerings aligned with market demand.

Coach and Guide Security Consultants:

- Mentor to the team of security consultants, providing guidance and support in their professional development.
- Conduct regular performance evaluations, identify training needs, and coordinate training programs to enhance the team's expertise.
- Foster a collaborative and knowledge-sharing environment within the team.

Advise Customers on All Management Levels:

- Engage with clients at various management levels to understand their security requirements and objectives.
- Provide expert advice and guidance on Azure security architecture, solutions, and best practices.
- Assist clients in formulating and implementing effective security strategies and roadmaps.

Oversee Customer Implementation Projects:

- Lead the planning, execution, and delivery of Azure security implementation projects.
- Ensure project milestones and deliverables are achieved within specified timelines and budget.
- Collaborate with cross-functional teams, including architects, engineers, and project managers, to ensure successful project outcomes.

Act as Lead Consultant on Customer Assignments:

- Serve as the primary point of contact and trusted advisor for key customer engagements.
- Conduct comprehensive security assessments, and risk analyses for clients' Azure environments.
- Design and implement robust security solutions tailored to meet clients' specific requirements.

Support Sales Process and Proposals:

- Collaborate with the sales team to support business development activities.
- Participate in pre-sales engagements, including solution presentations and technical discussions.
- Contribute to the creation of sales customer proposals, ensuring alignment with clients' security needs and industry standards.

Skills and Qualifications

- Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent experience).
- Extensive experience in Azure cloud security and a deep understanding of Azure services, networking, and identity and access management.
- You like to, and have the ability to coach and mentor consultants in the team, and during customer projects
- Excellent communication and interpersonal skills, with the ability to effectively convey complex security concepts to technical and non-technical stakeholders.
- Demonstrated experience in overseeing and delivering successful security implementation projects.
- You have experience in translating complex, commercial questions into concrete, technical functional solutions (pre sales)

- You enjoy (further) developing high-quality solutions together with a team.
- Strong knowledge of security frameworks, standards, and regulations (e.g., NIST, ISO 27001, GDPR).
- Relevant Microsoft certifications such as SC-100: Microsoft Cyber Security Architect, SC-200: Microsoft Security Operations Analyst, AZ-500: Microsoft Azure Security Technologies & AZ-700 Azure Networking Solutions, MS-500: Microsoft 365 Security
- Relevant industry certifications such as Certified Azure Security Engineer, Certified Cloud Security Professional (CCSP), or Certified Information Systems Security Professional (CISSP) are highly desirable.
- You enjoy (further) developing high-quality solutions together with a team.
- You like to focus on the latest Microsoft technologies
- Visionary: you are constantly looking at new applications and possibilities
- Analytical, to-the-point, customer-driven, creative, pragmatic and result-oriented

What we offer

- Remote working; a lot of freedom and independence
- You are in control; plenty of training and development opportunities
- Informal non-hierarchical working atmosphere
- A job at a progressive software consultancy/implementation organization that uses the latest Microsoft technologies
- A working environment that challenges you and offers plenty of opportunities;
 - Further development of security solutions and offerings
 - Build the team of security consultants
 - Collaboration on security topics with our Modern Work and Business Apps teams
 - And if it happens to be on your bucket list: international (collaborative) work
- A healthy work-life balance. Parents can count on extra days off (parental leave, care leave, ect)
- Good primary and secondary employment conditions, including; 27 vacation days, excellent pension scheme, bonus scheme, expense allowance, lease car, profit-sharing scheme: after all, we do it together
